

AMMAR HUSAM AL-HASAN

GRC & RISK MANAGEMENT | COMPLIANCE | AUDIT | PRODUCT & SOLUTION DEVELOPMENT

Amman, Jordan | +962 79 590 30 12 | ammар.alhasan.grc@gmail.com | [Linkedin](#) | [Portfolio](#)

Professional Summary

GRC and GRC Solutions professional with a Bachelor's degree in Cybersecurity and Cloud Computing and hands-on experience supporting Compliance, Risk Management, and Audit systems across multiple clients. Currently working as a GRC Professional Services Engineer, combining GRC knowledge with client engagement, requirements analysis, system configuration, issue resolution, and process improvement. Experienced in identifying operational challenges and developing practical technology solutions to improve GRC documentation, workflows, and release management processes. Certified in GRCP and GRCA, with knowledge of COBIT 2019 and cybersecurity governance frameworks.

Professional Experience

Professional Services Engineer

Mg Paradigm | Jan 2026 – Present | Amman, Jordan

- Support and manage GRC systems across **Compliance, Risk Management, and Audit**, including client support, system configuration, requirements, and issue resolution.
- Participate in client meetings and requirements discussions, understanding business and system needs and translating them into practical GRC solutions.
- Support GRC workflows, documentation, reporting, and system enhancements based on client and organizational requirements.
- Designed and developed a CMS documentation platform from scratch to streamline the creation and management of step-by-step system manuals and improve the client experience.
- Identified recurring challenges in the software release and deployment process and developed a release and deployment management platform to improve release tracking, script management, deployments, backups, client status, requirements, and reporting.
- Collaborate with technical and functional teams to analyze issues, improve processes, and deliver system enhancements.

Cybersecurity Analyst – GRC & Compliance (Training Program)

Central Bank of Jordan | Jul 2025 – Sep 2025 | Amman, Jordan

- Conducted ISO 27001 and COBIT-based compliance checks across internal controls.
- Performed cybersecurity risk assessments and documented risk findings and treatment actions.
- Contributed to internal audit activities, including evidence collection and audit preparation.
- Supported policy reviews, governance documentation, and control updates.
- Coordinated with technical teams to map security controls to governance and risk requirements.
